

POWERED INDUSTRIAL TRUCK SERIES

#6 Maintenance and Daily Operations

PRACTICE SAFETY

Course Summary:

OSHA requires that every industrial powered truck must be inspected daily prior to use. In this course, you will be taken through a sample inspection checklist. You will learn what to look for with the aid of photos and how to deal with any problems you may find. This course is one of seven with bundle pricing available. We encourage you to take them all since the information is beneficial in preparing you for your ultimate OSHA certification.

Highlights:

- Printable daily checklist for inspection
- OSHA requirements
- Safety tips for changing a battery
- When to alert a service technician
- Fuel safety
- Reading your forklift gauges

Battery Check

Gauges

Tires
