

Course Summary:

In this basic course, you will learn how to read and understand an MSDS (Material Safety Data Sheet). A brief history of MSDS is offered with an overview of the laws that make them necessary. Each section of the form is identified and practical examples are shown along the way to help the reader apply the information to their daily environment. There is a strong emphasis on chemical safety, accident prevention and steps to maintain a safe workplace. For a more indepth course, review the details of our advanced MSDS course which offers all of this and more.

Highlights:

- Hazardous materials, chemicals and waste
- OSHA requirements
- Locating and reading MSDS in your facility
- First aid for exposure
- Safety equipment
- NFPA fire safety

V. HEALTH HAZARD / ROUTE(S) OF ENTRY

Threshold Limit Value	Aliphatic Petroleum
Symptoms of Overexposure	
Inhalation (Breathing):	May cause anesth
Skin contact:	May cause drying
Eye contact:	May cause irritat
Ingestion (Swallowed):	May caused irritat
First Aid Emergency Procedures	
Ingestion (Swallowed):	Do not induce vom
Eye Contact:	Immediately flush
Skin Contact:	Wash with soap a
Inhalation (Breathing):	Remove to fresh a
	If breathing is diffi

Glossary Terms & Acronyms in this course:

Absorption	Hazardous Polymerization	Reactivity Data
ANSI	HMIG / HMIS	REL
Boiling Point	Inhalation	Routes of Entry
Carcinogen	Lower Explosive Limit	Skin Notation
CAS Number	NFPA	Synergy
Exposure Limits	OSHA	Vapor Density
Flashpoint	pH	Ventilation
